- To access the Toolkit: www.nsisstrategies.com/ or www.nsisstrategies.com/telehealth
- Questions and Comments – Please use the chat box – Q&A at the end
- Quick Questionnaire
- Want to discuss more? Consult or discussion call: nick@nsistrategies.com or 808.895.7679

Telehealth Resilient Leadership Services About Us

Telehealth

NSI Strategies has developed a free Telehealth quick start toolkit (posted below). We also have expertise in this area. If you would like additional support, please feel free to reach out to Nick Szubiak at nick@nsistrategies.com.

QUICK START TOOL KIT

The toolkit provides a snap shot overview of the items needed to get telehealth up and running immediately. It includes: diagnosis codes, procedure codes & billing, policy regulations, platforms, HIPPA and more.

Thank you to our toolkit contributors!

This Toolkit was created with the invaluable experience and knowledge from our integrated care colleagues:

Andrew Suchocki, MD, MPH

- Medical Director, Clackamas County Health Centers, Oregon City, Oregon
- Medical Director, Synergy Health Consulting, Medford, Oregon
- Clinical co-Investigator, Oregon Community Health Information Network (OCHIN) and Oregon Health and Sciences University (OHSU) Department of Family Medicine

Victoria Hanes, PsyD
Chief Operations Officer

Telehealth Startup Tool Kit

- Based on information from the Center for Connected Health Policy, **The National Telehealth Resource Center** <https://www.cchpca.org/> as well as organizations listed in the resources section.
- The toolkit is meant to give you a snap shot overview of the items needed to get **telehealth up and running immediately**.
- Telehealth billing, reimbursement and policy is similar to integrated care models in that it is **state specific**. Therefore resources are provided that are state specific.
- **We are in this together and need all of our expertise.** If you have feedback, corrections, ideas, case examples, please connect with Nick so we can continue to bolster the content of the toolkit.

TELEHEALTH SUPPORT PACKAGE

NSI is offering a telehealth implementation support package for health centers. This offering is designed to support fast, operational and sustainable telehealth care delivery.

The NSI Team is proud to offer this package. Your journey begins with the NSI Team supporting you to complete your Telehealth Implementation Work Plan, which includes working with our telehealth professionals to determine goals, outcomes, timelines and more. It continues with our expert support that includes a Medical Director, Behavioral Health Director, Telehealth technical experts and more.

Outcomes include:

- Implementation or significant improvement of telehealth care delivery
- Identify telehealth goals, outcomes and timeline
- Access to technical assistance and consultation to support achievement of telehealth goals
- Improved telehealth skills for behavioral health clinicians and primary care providers through two training webinars
- Analysis and development of telehealth clinical pathways and workflows
